

For a few hours NASA accidentally posted a file that contained the names, institutions, and proposal names for the Notices of Intent submitted in response to the UnESS AO.

In the UnESS AO, we allowed proposers to indicate if they would like their names and institutions listed on the UnESS web page. It is NASA's policy to release this information only if we receive **explicit** permission, and to not include the name of the proposal. A list of the proposers who explicitly gave permission for release of their names is available below.

Release of a file containing more than the explicitly approved information violated NASA's policy. If you have a copy of this file, we request that you please not use this information, and delete any copies of the file. We apologize for this error. If you have any questions or concerns, feel free to contact:
